

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted for. Please retain these installation instructions for future reference.

These Side Mirrors are exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.

INSTALLATION INSTRUCTIONS

Note: Shift vehicle transmission into "PARK". Turn key to "OFF" position and remove from vehicle.

Product and accessories picture:

1. Use M5 screws and nuts to secure the mounting bracket to the side mirror. As shown in picture:

2. Unscrew the fixing screw at the A-pillar of the original vehicle, then use the screw that matches the side mirror, insert the aluminum lining tube, and install the side mirror bracket back onto the vehicle. Finally, use a nut to fix it (the other side can be installed in the same way). As shown in picture:

Note: It is best to replace and disassemble the screws of the original vehicle one by one to avoid misalignment of the A-pillar interface caused by simultaneous disassembly of two screws, which may make subsequent installation difficult.

Side Mirrors for Kawasaki Mule PRO-FXT

ZP-YJ-031005-021

Note: Please refer to the installation video in the Amazon listing before your installation, or contact the seller for the installation video.

3. Installation completed!
