

BEFORE YOU BEGIN

Read these instructions and check to be sure all parts and tools are accounted. Please retain these installation instructions for future reference.

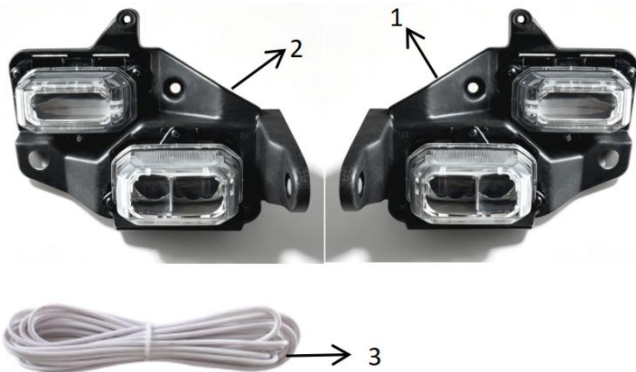

IMPORTANT

This LED HEADLIGHTS KIT is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris.

Note: Please refer to the installation video in the Amazon listing before your installation, or contact the seller for the installation video.

INSTALLATION INSTRUCTIONS

1. Shift vehicle transmission into "PARK". Turn key to "OFF" position and remove from vehicle.

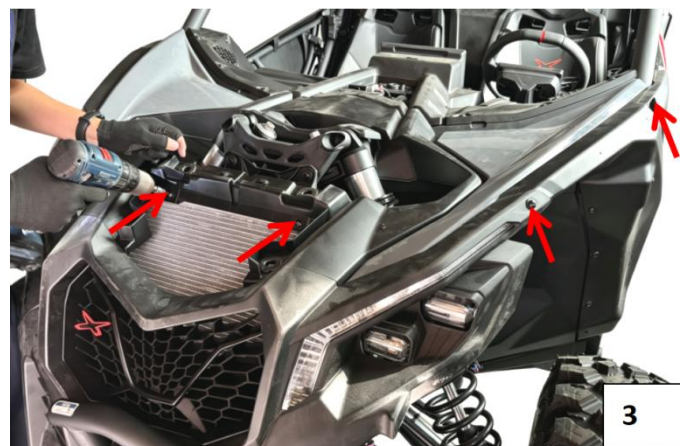

2. First, remove the vehicle's hood, as shown in Figures 1-2.

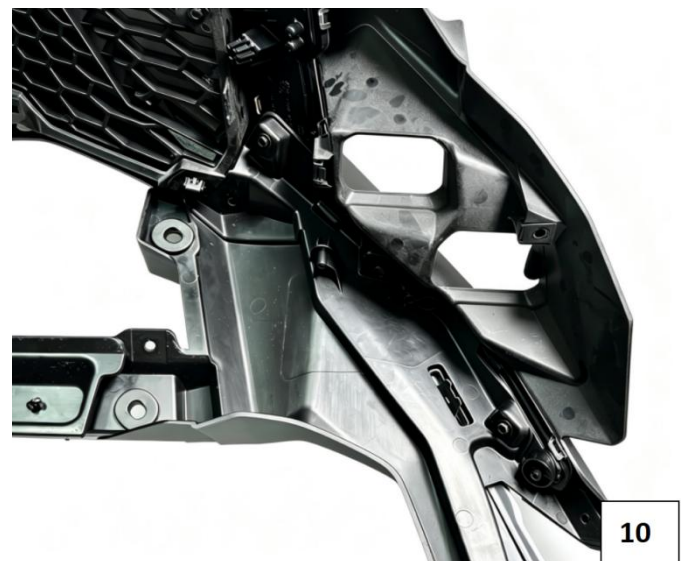

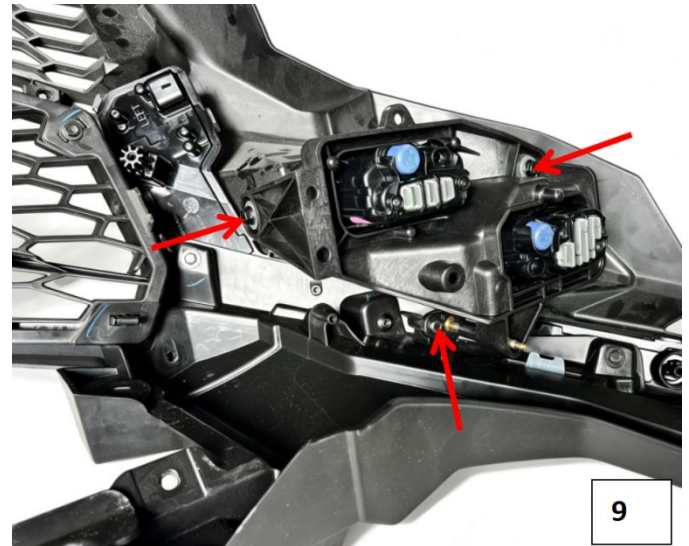

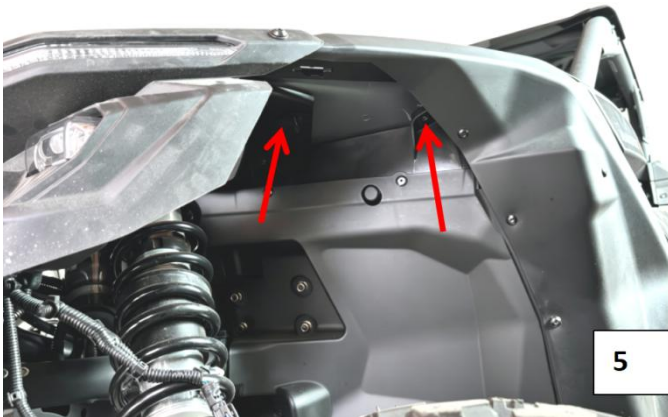

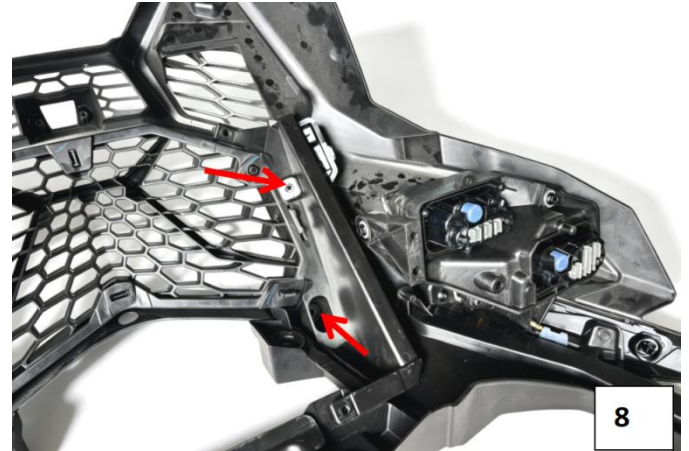

3. Remove the front fairing from the vehicle (on the side with the fuel cap; you'll need to open the fuel tank guard to access the screws, as shown in Figure 7). See Figures 3–7:

NOTE: Disconnect the headlight wiring harness connector beforehand.

4. Remove the lining brackets from the front fairing, as well as the original headlights. See Figures 8–10.

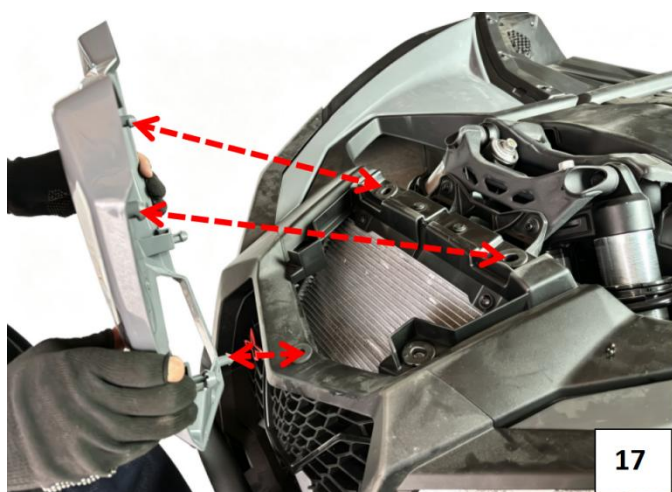

5. Transfer the “工”-shaped rubber part, the end cap, and the adjustment screw from the vehicle's headlight to the new headlight, reinstalling them in their original positions as shown in Figures 11–13. Use the vehicle's original screws to mount the new headlight back onto the fairing, and then reinstall the inner lining bracket in its original position as shown in Figure 14.

6. Finally, reinstall the front fairing onto the vehicle, connect the wiring harness connector for the new headlights, and reinstall the hood as shown in Figure 15.

NOTE: Use the white wire from the accessory kit to connect the red wire from the headlight in parallel with the vehicle's daytime running lights, thereby providing power to the blue or yellow ambient lights inside the headlight.

7. Installation complete.

Note: The headlights come with ambient lighting in only one color—either blue or yellow.
